M.K. DAV Public School, Daltonganj Organises Seminar on Cyber Safety Awareness

In an era where digital technology has become an integral part of Education, awareness of cyber safety is essential for every learner. With this understanding, M.K. DAV Public School, Daltonganj, organised a seminar on Cyber Security in observance of Cybersecurity Awareness Month in October 2026. The initiative was in accordance with the advisory issued by the National Council of Educational Research and Training (NCERT), under the Ministry of Education, Government of India, which encourages Educational Institutions to promote safe and responsible digital practices.

The seminar was conducted by Mr. Vivek Kumar, Professor of Computer Science at DAV Institute of Engineering and Technology, Daltonganj, who served as the resource person. He acquainted the students with various aspects of cyber security and explained the potential risks associated with the use of digital platforms. His session covered online privacy, cyber threats, data protection and the importance of secure internet practices. He also drew attention to the need for caution while sharing personal information online and encouraged students to exercise sound judgement in their digital interactions. The session enabled students to understand the challenges of the virtual world and the precautions necessary to navigate it safely.

The Honourable Principal, MRS. INDRANI CHATTERJEE, emphasised that digital literacy must go beyond the ability to operate technological devices. She expressed that students need to understand the responsibilities that accompany access to the digital world. She further stated that such initiatives are essential to prepare young learners for the opportunities and challenges of an increasingly technology-driven society. The Institution places considerable importance on equipping students with the knowledge and judgement required for safe technology use. She also stressed that awareness of cyber security must become a regular part of students' digital habits rather than remain limited to occasional discussions.

Following the informative session, a pledge on Cyber Safety Awareness was administered by Mrs. Meenakshi Karn, Supervisory Head of the Junior Wing. The pledge encouraged students to practise safe online behaviour and exercise responsibility while using digital platforms. It served as a reminder that cyber safety is not merely a matter of technical knowledge but also a matter of individual responsibility and prudent digital conduct.

The seminar was a valuable Educational initiative that reinforced the importance of cyber awareness among students. It also brought attention to the Institution's commitment to providing an informed and secure digital learning environment.
