

## **Silent Storytelling and Shared Commitment: Jal Pakhwada 2026 at M.K DAV Public School, Daltonganj**

In an moving display of environmental awareness, the Institution recently hosted a mime performance as part of the Jal Pakhwada 2026 mission. The event sought to bridge the gap between creative storytelling and the urgent need for global water security.

Using only movement and facial expressions, students crafted a compelling narrative that brought the realities of water scarcity to life. By stripping away dialogue, the performance relied on earnest and spirited expressions to emphasize the gravity of the ecological crisis. This silent yet powerful display challenged the audience to rethink their relationship with natural heritage and consider the weight of their daily choices.

The Honourable Principal, MRS. INDRANI CHATTERJEE views this initiative as a way to cultivate a legacy of care that stays with students long after they leave the campus. She believes the Institution's role is to foster an ethos of conservation where protecting resources becomes a matter of personal honor rather than a set of rules. For her, the milestone is reached when our learners develop a sense of duty for the environment instinctively valuing every drop of water. By inculcating such values, it is being ensured that the students lead with a unified footprint towards a more secure and sustainable world.
