

Visual Expressions Supporting the TB- Free India at M.K DAV Public School, Daltonganj

As part of the TB Mukta Bharat initiative , the Institution organised a Poster Making competition to further engage students with the cause. The activity served as a platform to present their ideas on tuberculosis and the need for greater public understanding.

Through striking visuals and meaningful messages, participants conveyed the importance of timely care and social support. Their work also reflected an informed approach to prevention and a growing sensitivity towards those affected. Their canvas became a voice and the paint carried a message. The posters designed by them stood as a testament to how awareness can be expressed powerfully through creative means.

This effort reflects the vision of the Honourable Principal, MRS. INDRANI CHATTERJEE who regards such engagements as an important part of meaningful education. She believes that such experiences promote independent thinking and nurture a thoughtful approach with a growing sense of accountability towards society. She believes that when students are given opportunities to engage with real and relevant concerns, their learning gains depth and purpose. She further remarked that over time, this approach helps shape individuals who are aware of their surroundings and prepared to act with responsibility and intent.
