

M.K. DAV Public School, Daltonganj Celebrates the Enduring Bond Between Humanity and Nature

M.K. DAV Public School, Daltonganj observed World Nature Conservation Day with a series of activities aimed at encouraging environmental responsibility among students. The spirited involvement of both students and faculty transformed the routine awareness campaign into a deeply impactful and collective pledge for a greener tomorrow.

The observance commenced with a Cleanliness Drive during which participants worked together to clear the school surroundings and neighbouring areas. Equipped with brooms, gloves and waste bins, they demonstrated that civic responsibility begins with individual action. The campaign served as a practical reminder that a clean environment is the foundation of a healthy society.

The celebration also featured a Sapling Plantation and Seed Sowing Activity in which students carefully planted saplings and sowed seeds with the hope of nurturing greener spaces in the years ahead. The initiative conveyed that every young plant carries the promise of cleaner air, richer biodiversity and a sustainable future.

To spread awareness, a Slogan Writing Competition was organised which provided students with an opportunity to articulate their thoughts on conserving Nature through creative expression. Their messages carried a sincere appeal for environmental protection while revealing an encouraging sense of ecological awareness.

The enthusiastic participation of the Honourable Principal MRS. INDRANI CHATTERJEE , teachers and students lent a special significance to the occasion as it gave the celebration a sincere earnestness that extended far beyond ceremonial observance.

The Honourable Principal of the Institution remarked that Nature possesses a quiet magnificence which sustains life without proclamation, yet every diminished forest or polluted river erodes the shared heritage of humanity. She believes Education reaches its true purpose when it inspires students to respect the living world and they can view the Earth as a precious gift to protect rather than a resource to exhaust. Through World Nature Conservation Day , she hopes to dissolve the distance between our students and the environment reminding them that we do not just live on this planet but we live with it and that its future is authored by our discrete and everyday actions.
